

ENERGY

in the 21st Century

GLOBAL WARMING

Cazenovia College in conjunction with the Center for Economic and Environmental Partnership, Inc. presents:

Global Warming: From Crisis To Solutions Identifying The Technology & Policy Answers

Friday, April 21, 2006
Cazenovia College, Cazenovia, N.Y.
Schneeweiss Athletic Complex

This Symposium is the second in a series that will explore ways to meet an increasing demand for energy while ensuring a sustainable environment for future generations. The Symposium is an academic conference, educational in nature. The mission is to present a comprehensive understanding of energy sources and the problem of global warming, and to gain insights into possible approaches without endorsing any products, technology or positions. Join the academic community, statewide environmental and business community and elected officials on April 21, 2006 at Cazenovia College to discuss **Energy in the 21st Century, Global Warming: From Crisis to Solutions.**
